Lecture 9. Our First Java Project

Comments in Java (Java 中的注释)

Text ignored by the compiler

- Write notes
- Find errors

```
// this is a single line comment

/* this is a
multi-line
comment */
```

Java's comment rules are the same as those of C language

Write and Run a progarm in IntelliJ

```
Project ~
                             Main.java ×
                                    public class Main {
    80
      > 🗀 .idea
                                       public static void main(String[] args) {
      > 🗀 out

∨ □ src

                                          System.out.println("Hello!!");
       > 🗀 META-INF
          © Main
        .gitignore
        lesson_9_code_1.iml
    Scratches and Consoles
    Run
         Main ×
       Hello!!
   ⇒ Process finished with exit code 0
```
